WEB DEVELOPMENT & DIGITAL STRATEGY

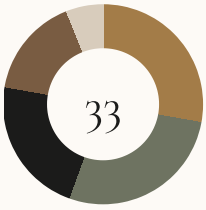
EXECUTIVE SUMMARY

Platform *Overview*

A fully custom luxury real estate platform with integrated CRM, AI-generated photography, original media, and zero recurring platform fees.

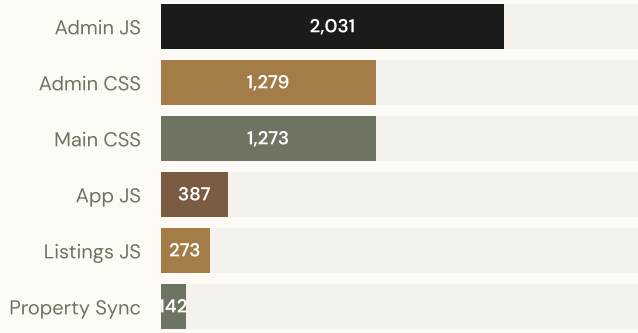
33	13,517	57	$0
TOTAL PAGES	LINES OF CODE	MEDIA ASSETS	MONTHLY FEES

PAGES BY CATEGORY



- Core Pages (9)
- Journal Articles (8)
- Property Pages (7)
- Admin Portal (8)
- Utility Pages (1)

CODEBASE BREAKDOWN



KEY DIFFERENTIATOR

Unlike platforms built on Luxury Presence, Sierra Interactive, or kvCORE — which charge $500–$2,000/month in subscription fees — this site runs on static hosting with zero recurring costs. That's a savings of **$12,000–$24,000/year** in platform fees alone.

PUBLIC WEBSITE

25 Pages of *Luxury* Content

Custom-designed and hand-coded — no templates, no page builders, no WordPress.

9

Core Marketing Pages

Homepage with hero video, animated stats counter, featured properties grid, services tabs, testimonials. Plus: Buy, Sell, Properties (4-filter search), Communities (7 neighborhoods), About, Contact, Journal, and Private Consultation pages.

8

Long-Form Journal Articles

2,000+ word SEO-optimized articles covering market insights, neighborhood guides, investment analysis, architecture, and buyer advisory. Each with social sharing, sidebar, and inline CTAs.

7

Property Detail Pages

Full gallery layouts with 3-image grid (AI-generated matching angles), property specs, narrative descriptions, feature lists, and inquiry forms. **Live CRM sync** — edits in the admin portal instantly update the public property page.

15+

GSAP Scroll Animations

Scroll-triggered reveals, parallax backgrounds, staggered card entries, clip-path curtain wipes, hero entrance sequences, animated stat counters, and a custom dual-element cursor system.

Design System

TYPOGRAPHY	
Headlines	Cormorant Garamond (300–600)
Body / UI	DM Sans (300–500)
Approach	Luxury serif + clean sans-serif

COLOR PALETTE	
Bronze #A47C48	Primary
Charcoal #1B1B1A	Dark
Sage #6E7462	Secondary
Cream #F3EFE8	Background
Saddle #7A5C43	Warm

Custom Music, Video & *Search Optimization*

Proprietary media production and enterprise-grade SEO infrastructure built into every page.

6 Tracks

Custom Music Player with Advanced Controls

A fully functional streaming music player with Web Audio API equalizer visualization, play/pause/skip/prev controls, **draggable scrub handle with pulsating animation**, **shuffle and repeat (all/one) modes**, **volume slider with mute toggle**, and **marquee scrolling song titles**. Features **4 original songs** produced by **Rockstarr Media** — "More Than a Key," "From Runways to Driveways," "Concierge 360," and "Concierge 360 (Remix)" — plus 2 licensed feature tracks. The player auto-advances through the playlist and displays real-time EQ bars on the active track.

Interactive

Custom Video Player with Integrated Game

A branded cinematic video player with custom play/pause overlay, fullscreen modal expansion, progress bar, and time display. The modal backdrop features an **integrated particle-catch game** built on HTML5 Canvas — floating particles that respond to mouse movement, keeping viewers engaged while the video plays. Includes score tracking and real-time animation.

15

AI-Generated Property Photography

Gallery images generated via **Google Gemini (Nano Banana) API**. Each of the 6 listings features 3 matching twilight photos from different angles — aerial, side, and entrance — precisely matching descriptions and architectural style.

Live Sync

Real-Time CRM-to-Property Page Sync

Synchronization engine (**property-sync.js**) reads listing data from localStorage and dynamically overrides gallery images, titles, specs, descriptions, pricing, and status. Uses **BroadcastChannel API** for instant cross-tab updates.

SEO Infrastructure

ELEMENT	STATUS	DETAILS
Sitemap.xml	COMPLETE	22 URLs with priority weighting and update frequency
Robots.txt	COMPLETE	Public pages crawlable, /admin/ blocked from indexing
JSON-LD Schema	COMPLETE	7 types: RealEstateAgent, WebSite, FAQPage, Service, BreadcrumbList, Article, Organization
Open Graph + Twitter	COMPLETE	All 25 pages with og:title, og:description, og:image, twitter:card
Canonical Links	COMPLETE	Every page with proper canonical URL
Meta Descriptions + Keywords	COMPLETE	Keyword-optimized targeting luxury homes, San Antonio, Hill Country
Favicon + Social Image	COMPLETE	SVG + PNG (16/32/180px) + 1200×630 OG image for social sharing

AGENT PORTAL

Integrated *CRM & Admin*

8 pages of custom-built management tools — no third-party platform required.

8	3,310	5	82+
ADMIN PAGES	LINES OF ADMIN CODE	CHART.JS CHARTS	FUNCTIONS

Dashboard

Real-time KPIs (active listings, portfolio value, lead count, campaigns). Chart.js activity graph. Recent inquiries and listings tables. Time-of-day greeting. Animated counters.

Listings Manager

Full CRUD with drag-and-drop reorder. **Photo upload (5 per listing, base64) with gallery preview and delete**. Inline status/visibility/tag editing. Filter chips. **Real-time sync to public site via BroadcastChannel API**.

Inquiries / CRM

6-stage lead lifecycle (New → Contacted → Warm → Hot → Escrow → Closed). 11 source types. Listing association. Detail modals. Email deeplinks. Filter pills.

Campaign Manager

4-step creation wizard. 4 campaign types (Email, Social, Direct Mail, Open House). Engagement metrics tracking. Status lifecycle. Duplicate and detail panels.

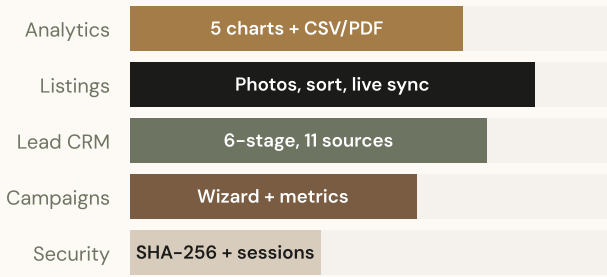
Analytics Dashboard

5 Chart.js visualizations (pipeline bar, status polar, source doughnut, intent pie, budget bar). Source breakdown bars. Performance table. CSV export. Styled PDF report export.

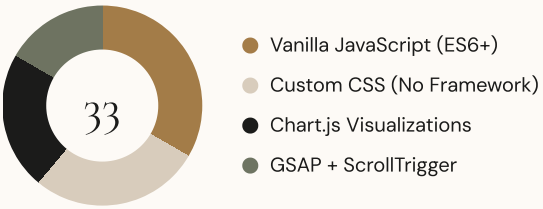
Security & Real-Time Sync

SHA-256 password authentication via Web Crypto API. Desktop-only enforcement. SessionStorage auth. BroadcastChannel cross-tab real-time sync. localStorage persistence.

ADMIN FEATURE DEPTH



TECHNOLOGY STACK



NEW FEATURES (MARCH 2026)

Latest *Enhancements*

Features added since the previous valuation, representing significant additional development value.

AI

AI-Generated Property Photography

Integrated Google Gemini (Nano Banana) image generation API to produce 15 photorealistic twilight property photos. Each listing gets 3 matching angles generated from detailed architectural prompts. Images are consistent with property descriptions — limestone ranches, modern contemporaries, vineyard estates — eliminating stock photo mismatches.

Sync

Live CRM-to-Property Sync Engine

New **property-sync.js** module (142 lines) reads listing data from localStorage and dynamically updates property page content in real-time. Changes to gallery images, title, location, specs, description, price, and status in the admin portal instantly reflect on the public property pages via BroadcastChannel — zero refresh required.

Advanced Music Player Controls

Pulsating draggable scrub handle with full mouse and touch support. Shuffle mode with smart non-repeat randomization. Three-state repeat (off / repeat all / repeat one) with visual badge. Expandable volume slider with mute toggle and 3-state speaker icon. Marquee scrolling for long song titles with seamless loop animation.

6th Track: Nathaniel Rateliff

"Redemption" by Nathaniel Rateliff added as track 6 to the music player, expanding the playlist. Track count updated across the UI. Full metadata loading with duration display.

CRM Photo Gallery Management

All 6 listings now have pre-populated 3-photo galleries in admin. The edit listing modal shows all gallery photos with delete/reorder capability. First photo serves as the listing card thumbnail. Photos sync to public pages in real-time.

Consultation Page Nav Fix

Added scroll-triggered navbar transition on the Private Consultation page, matching the homepage behavior — transparent over the hero banner, fading to solid cream background with blur on scroll.

DEVELOPMENT VALUE ADDED

These enhancements represent approximately **$8,000–$15,000** in additional development value: AI image generation integration ($3,000–$5,000), live CRM sync engine ($2,000–$4,000), advanced audio player controls ($1,500–$3,000), and photo gallery management system ($1,500–$3,000).

Agency Pricing *Assessment*

What a high-end design agency would charge for a website of this scope and quality.

COMPONENT	DESCRIPTION	AGENCY PRICE RANGE
Discovery & Strategy	Brand identity, competitive analysis, information architecture	$5,000 – $10,000
UI/UX Design	33 pages, luxury aesthetic, custom cursor, animation design	$18,000 – $30,000
Frontend Development	GSAP animations, responsive design, parallax, custom cursor	$15,000 – $25,000
Admin Portal / CRM	8 pages, full CRUD, 5 charts, auth, real-time sync, PDF/CSV	$22,000 – $38,000
Original Media Production	4 original songs, custom music player, video player with game	$8,000 – $15,000
AI Image Generation	Gemini API integration, 15 property photos, 3 angles per listing	$3,000 – $6,000
Live CRM Sync System	Real-time property page updates, BroadcastChannel, photo gallery	$4,000 – $8,000
Content Creation	8 long-form articles (2,000+ words each), SEO-optimized	$5,000 – $10,000
SEO Infrastructure	7 schema types, sitemap, keyword strategy, OG/Twitter cards	$3,000 – $6,000
Forms & Email Integration	Contact + consultation forms, FormSubmit.co delivery	$2,000 – $3,000
QA & Deployment	Cross-browser testing, mobile optimization, hosting	$2,000 – $4,000
Project Management	Agency overhead (15–20%), communication, revisions	$12,000 – $22,000

Total Market Valuation

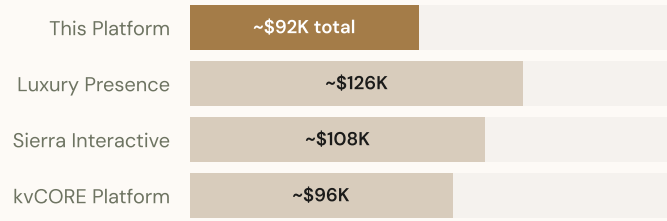
MID-TIER AGENCY	$30,000 – $50,000	WordPress/Squarespace with custom design
HIGH-END BOUTIQUE THIS BUILD	$75,000 – $110,000	Custom-coded, CRM, AI imagery, original media, live sync
PREMIUM AGENCY	$100,000 – $175,000	Agent Image, Luxury Presence, bespoke platforms

TOTAL COST OF OWNERSHIP

Long-Term *Value*

The financial advantage of a custom-built platform vs. SaaS alternatives.

3-YEAR COST COMPARISON



ANNUAL FEE SAVINGS

$12K–$24K

SAVED PER YEAR

No monthly SaaS fees
No per-lead charges
No platform lock-in
Full code ownership
